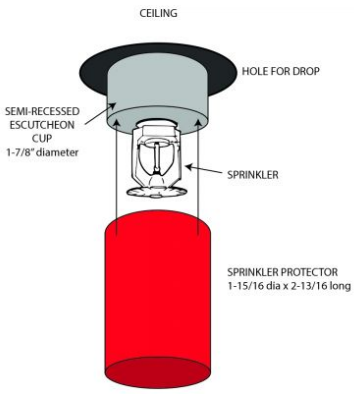
Escutcheon Head Protector Protective Cap 2-3/4" Deep

ITEM # 4510071-PROT



FIRE SPRINKLER HEAD PROTECTIVE CAP

1-15/16 dia x 2-13/16 long

Lightweight plastic tube fits over Semi-Recessed Escutcheon Inner Ring to protect from paint damage. Roller or Brush only! Not for use with Spray Paint!

NFPA 25 Requirement: This paint cover protects from unwanted painting of your sprinkler head which causes it not to function properly in the event of fire.

Painted sprinkler heads must be replaced.

Cost-Effective Solution: Using our paint covers saves time, money, and trouble by avoiding costly sprinkler replacements due to paint damage.

Highly Visible: These highly visible red covers are easy to spot during the job to avoid mistakes or accidental damage.

Always promptly remove these once the job is done.

Good Fit and Reusable: These fire sprinkler paint covers are 2-13/16 in. deep and fit over most flush and recessed pendent or sidewall fire sprinklers.

They are also cleanable and reusable.

WARNING: Caps must be removed and outer ring of escutcheon replaced after painting to allow sprinkler head to perform properly if a fire should occur.
