

SPOTTER LEVEL

Designed for use by pipe and sprinkler fitters, Spotter Levels are 7" long and made from billet 6061 aluminum, and feature large viewing ports with neon green vials for easier visibility in low light conditions. Screw the level into a threaded pipe fitting and use it to spot the outlet you are tightening either plumb or level.

These levels are milled on a 4th axis CNC machine to ensure accuracy. Each level is anodized bright red to stand out on the construction site. The large openings and neon green vials make it easier to see in low light.

Each level comes with four powerful N35 rare earth magnets inserted along the flat edge of the level, making it work as a typical torpedo level as well as a spotter.

The Spotter level has both 1" male NPT and 1/2" female NPT. It can also act as an emergency plug.
